Ihor Klovan

Senior Flutter Engineer · Remote (EU / UK / US time zones)

klyovan88@gmail.com

Summary

Senior Flutter engineer with 6+ years of Flutter and 10+ years in mobile and software development, shipping production apps to the App Store and Google Play for e-commerce, telecom, healthcare and education products in the US, UK and EU. Migrated two native products to Flutter: an iPad app now running on tablet, desktop and web, and the iOS + Android apps of a major UK telecom. Strong in clean, modular architecture, Melos monorepos, UI and performance optimisation, and custom animations. Mentor and onboard developers, run technical interviews, and use AI coding tools in daily work.

Core skills

- **Flutter & Dart:** Bloc, Riverpod, Provider, Redux, Freezed, GoRouter, AutoRoute; Flutter for iOS, Android, Web and macOS
- **Architecture:** Clean / modular architecture, Melos monorepos with shared packages, dependency injection, SOLID, code generation, code review
- **Performance & UI:** rendering and business-logic optimisation, isolates for heavy work (image processing, TensorFlow Lite), custom animations and transitions, adaptive layouts for phone, tablet and desktop, RTL / LTR
- **Product integrations:** push notifications (FCM), analytics (Firebase Analytics, Adobe Analytics, Amplitude), Google Maps and Translate APIs, i18n / l10n, accessibility
- **Testing:** unit, widget and integration tests; Mockito, Mocktail; TDD
- **Backend & networking:** REST, GraphQL, Firebase (Firestore, Cloud Functions, Realtime DB), TypeScript, Java, PostgreSQL, Drift, sqflite, Hive
- **CI/CD & tools:** Bitrise, GitLab CI, Azure DevOps, GitHub, Bitbucket, Jira, Figma; App Store and Google Play releases
- **Native & other:** eSIM, GenAI / AI-assisted development tools

Experience

Senior Software Engineer — E-commerce company (NDA)

Jun 2024 – Present · Remote

- Migrated the company's native iPad app to Flutter, extending it from a single codebase to tablets, desktop (macOS) and web.
- Took part in designing the app architecture and the backend side (TypeScript) together with the backend team.
- Acted as the team's Flutter point person: shared knowledge and practices with other developers.
- Worked daily with the product designer to deliver adaptive tablet and desktop UI.

Stack: Flutter, Dart, Bloc, Freezed, GoRouter, TypeScript, Flutter Web / iOS / macOS

Flutter Engineer — Trinetix

Jul 2023 – Jun 2024

Campus app for US universities combining wayfinding, food ordering and administrative tools.

- Delivered features end to end, from UI implementation to backend integration.
- Focused on performance, usability and scalability for a large student audience.
- Helped digitise everyday campus services that students and staff previously handled offline.

Stack: Flutter, Dart, Bloc, Freezed, AutoRoute, Firebase, Azure DevOps

Senior Flutter Engineer (short-term contracts) — Swivl, RiseApps

Apr 2023 – Jul 2023

- **Swivl** — EdTech app that helps teachers and students stay focused. Built the app from scratch, took part in architecture design, did code review, and implemented local storage with Drift and sqflite. GraphQL API.
- **RiseApps** — healthcare app for a leading US mental-health clinic. Developed and supported the app with Firebase Cloud Functions as the backend, took part in architecture design, and onboarded new team members.

Stack: Flutter, Dart, Bloc, Freezed, GoRouter, GraphQL, Drift, Firebase, Bitrise CI/CD, GitHub, Bitbucket

Senior Software Engineer / Flutter Developer — EPAM Systems

Nov 2021 – Apr 2023 · promoted to Senior in Nov 2022

Customer app for one of the largest telecom operators in the UK.

- Migrated the native iOS and Android apps to Flutter.
- Owned development and support of the Benefits and Settings sections.

Flutter Developer — AppVesto

Jun 2020 – Nov 2021

Multi-role e-commerce marketplace for buyers, suppliers, manufacturers and couriers.

- Chose the architecture approach and implemented new features, API integration and RTL / LTR UI.
- Implemented custom designs and animations across several app types, including a recipe app (recipes from ingredients you have at home) on mobile and Flutter Web.
- Did code review and communicated directly with the client and Product Owner.
- Implemented complex custom Rive animations

Stack: Flutter, Redux, Firebase, REST, isolates, Bitbucket, GitLab

Earlier experience

- **Backend Developer Intern — Netcracker** (Sep 2019 – Feb 2020): built the backend and UI of an interactive employee-testing platform and covered them with unit tests.
- **Android / Frontend Developer — R&D startup** (Dec 2017 – Sep 2018): delivery-management system; Android (Java), Angular, TypeScript, Firebase.

Education

MSc in Computer Science — Odesa National Polytechnic University

Netcracker Educational Center — software development programme (certificate)
